

**PRESS RELEASE**

**Leed extends its capability through acquisition of Ecospec**

ADELAIDE, 9 March 2023.

National water and civil infrastructure firm Leed Engineering and Construction has announced the acquisition of Ecospec, a specialist in the design and construction of structural remediation solutions, concrete remediation, environmental protection and infrastructure maintenance.

Ecospec Managing Director David O’Sullivan will retain a seat on the Board along with Leed’s founder and Chair Andrew Millar and Managing Director Craig Laslett who will also become Managing Director of Ecospec.

Mr Laslett said, “We are delighted to welcome Ecospec into the Leed Group. Their considerable expertise in structural remediation and environmental protection extends our already extensive capability in water and civil infrastructure. With our organisations’ shared values and complimentary skills, we saw obvious synergies and we are looking forward to working together to ensure even better outcomes for our clients”.

Mr O’Sullivan said, “I am excited at this opportunity to partner with Leed which will allow us to better service our existing clients and create new opportunities for both firms. We share a similar collaborative approach and a focus on working diligently in our clients’ best interests”.

## COMPANY PROFILES

### Leed

Leed is a privately-owned engineering and construction company delivering key infrastructure projects and recognised for its expertise in the water sector. Founded in South Australia in 2001, Leed has grown to become a national provider with offices in SA, Victoria and NSW, working on projects in metropolitan, regional and remote areas throughout Australia.

Leed has an excellent reputation for delivering projects on time and working in a collaborative way with clients, stakeholders and the wider community. Their experience, capability, financial stability, proven team and outstanding track record make Leed an ideal partner for complex infrastructure projects.

### Ecospec

Ecospec is a well-established civil engineering and construction firm specialising in the design and construction of structural remediation solutions, concrete remediation, environmental protection and infrastructure maintenance. Founded in 2014, Ecospec has a reputation for working closely with clients to deliver excellent long-term outcomes.
